

Frames are designed with added weight to withstand wind and stay in place.

# HARBOR SLING

SLING + PADDED SLING | ALUMINUM

Harbor features gently curved arms and our double layer sling. Harbor is one of our “Designed with Weight” collections, making it ideal for windy conditions. Custom aluminum extrusions are used for the arms and base to provide a low-maintenance and corrosion-free material for those high-wear components, while powder-coated, solid-steel cross bars and internal side rails add weight.

## PRODUCT FEATURE

This collection features powder-coated, solid-steel cross bars and internal side rails for added weight. The entire swivel rocker undercarriage is zinc-plated prior to powder coating. A 2-3/4" x 3/8" solid-steel plate is designed into the undercarriage for additional weight.

HIGH BACK DINING CHAIR

S 32379 PS 32479
