

WHY YOU WILL LOVE OUR DREAMCORE CUSHION

DREAMCORE CUSHION HIGHLIGHTS *Featured on Elements, Havenhill, Liberty and Revive cushion collections.*

The premiere DreamCore seat cushion features High Resilient furniture-grade foam. High Resilient foam provides exceptional durability and longevity, while offering an outstanding level of comfort. Unlike conventional foams, the cell structure of High Resilient foam is less uniform and more random, creating a stronger structure, excellent elasticity, increased supporting force and ultimately, unparalleled comfort.

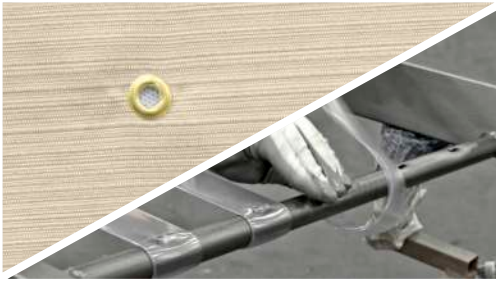

BACK CUSHION

The back cushion is constructed with moisture-resistant ticking and is engineered to match the silhouette of the cushion, creating a tailored look. Individual channels hold the fill in place and create both comfort and support.

SEAT CUSHION

The seat cushion is constructed with High Resilient furniture-grade foam wrapped with a polyester fiber layer and moisture-resistant ticking that is glued, not sewn, to prevent moisture penetration.

SEAT DECK & GROMMET VENTING

The seat deck is constructed of 100% virgin vinyl strapping for enhanced comfort. Virgin vinyl straps do not contain clay fillers, which reduce strap memory. The underside of the seat cushion cover features grommet openings for breathability.

BACK ATTACHMENT

Homecrest Liberty and Havenhill seat and back cushions feature a Velcro flap back for security. Elements and Revive seat and back cushions feature a sewn seam to attach the cushions together, which eliminates the use of ties or tabs.
