

# WHY YOU WILL LOVE OUR HOT FIRE TABLES

Available in coffee, chat, dining and balcony heights, Homecrest fire tables offer a powerful 60,000 BTU burner (30,000 BTU on fire tables with the Nova base) and come standard with your choice of fire jewelry, as well as a secure key, natural gas orifice, black 3/4" aluminum fire burner riser and match-light ignition.

## OUTDOOR FIRE TABLE HIGHLIGHTS

### ACCESSORIES

We offer several reflective fire jewelry options, lazy susans, painted aluminum lids and fire table cover options. Homecrest highly recommends the use of a glass guard when operating fire tables in windy conditions. Prolonged exposure to flames that are blown flat to the table surface may cause slight discoloration of the cosmetic surface.

### EASY PROPANE ACCESS

Each fire table base allows for a 20 lb vertical propane tank (utilized with all round, chat rectangular and chat square fire table bases) or horizontal propane tank (utilized with coffee square and rectangular fire table bases). These tanks are hidden, yet are easily stored and accessed by being mounted on the door or using a pull-out drawer. Our fire tables can either be fueled by propane or converted to natural gas.

### EXTERNAL KEY

Each fire table comes equipped with a removable key valve, providing easy flame control when in operation and the added safety of a removable key to prevent tampering when not in use.

### FIRE BURNER CONSTRUCTION

All of our fire pan inserts come standard with an elevated 3/4" black aluminum riser to prevent heat transfer to the top. All of our fire burner/pan inserts are stainless steel and are powder-coated black to avoid discoloration of the burner surface. Our 20" round-shaped fire burner inserts provide additional safety, concentrating the flames towards the center of the burner.
