

WHY YOU WILL LOVE OUR LUXE OUTDOOR CUSHION

LUXE OUTDOOR CUSHION HIGHLIGHTS *Featured on Emory and Sutton cushion collections.*

The Luxe Outdoor seat cushion is constructed with a combination of materials for durability and longevity. The foam core is wrapped in moisture-resistant ticking that is glued, not sewn, to prevent moisture penetration. It is then wrapped with a polyester fiber layer to provide a soft sit to the cushion. Luxe Outdoor back cushions incorporate three layers of polyester fiber, which does not hold moisture and provides comfortable back support.

Luxe Outdoor
CUSHIONS

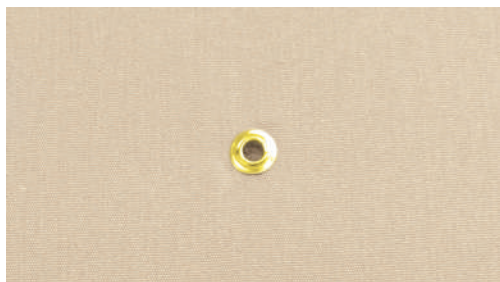

BACK CUSHION

Back cushions are constructed using three layers of specific polyester fiber densities to provide stability and comfort. Polyester fiber fill does not hold moisture and does not need to be wrapped in a moisture-resistant material.

SEAT CUSHION

Seat cushions use a 4" inner core of High Resilient foam wrapped in moisture-resistant ticking. The inner core is then wrapped in moisture-resistant polyester fiber. This combination creates the comfort and durability of the Luxe Outdoor seat cushion.

GROMMET VENTING

The casing of all Luxe Outdoor seat cushions feature grommet openings for breathability.

BACK ATTACHMENT

The seat and back cushion are held in place with snap fabric tabs using the fabric of the cushion.
