

WREN CUSHION

ALUMINUM

Available in: **C** Cushion

Our Wren collection is inspired by a bird in flight, the arms curving downward like wings gliding gracefully over water. The frame is constructed using powder-coated aluminum extrusions, ensuring maximum durability and weather resistance. Wren's size and scale is a representation of our long heritage of crafting quality furniture for every outdoor space. The comfortable cushions offer a seating experience as relaxing as it is functional.
