- Made in the USA

Stainless Steel Quartz Heater

Our C-Series heaters are energy efficient, with wide, polished reflectors that provide comfortable and uniform heat coverage. For residential or commercial use, this C2024SS model is made of commercial-grade stainless steel.

Infratech quartz elements provide pleasant medium wave heat. Competing heaters utilize shortwave halogen elements which produce more intense heat and emit a very bright, harsh-colored light. By contrast, Infratech medium wave elements effectively heat your space, while providing a soft, warm glow that is practically unnoticeable.

Clean Energy

For Continuous Use Infratech elements are rated for near 5,000 hours of continuous use. In many cases, you will find yourself enjoying your heater for years before a replacement would be necessary. Always refer to the C-Series manual for specific instructions, and be sure to disconnect the power to your heater before attempting to change an element.

About the Manufacturer

Founded in 1966, AEI has operated under a consistent premise: provide the finest in innovative outdoor cooking and patio heating products to discriminating consumers and commercial customers. AEI is also the only single source of quartz electric, horizontal gas, umbrella domed, Natural and Propane Gas heaters. Their mission has always been simple: supply the perfect heating equipment to enhance any patio then back it up with industry leading warranties and support
