- Minimal Maintenance Costs
- Flush Mount Available: #18-2300
- 3 Year Warranty
- Made in the USA

Quartz Heating with Infratech Technology

Infratech quartz element heating provides pleasant medium wave heat, not the bright harsh-colored light that is emitted from competing brands. By contrast, Infratech medium wave elements effectively heat your space, while providing a soft, warm glow that is practically unnoticeable.

Our single element heaters are energy efficient, with wide, polished reflectors that provide comfortable and uniform heat coverage. For residential and commercial use, this C2524SS model is made of commercial-grade stainless steel.

More Efficient than a Fire place Traditional fireplaces are less than 50% efficient when producing heat. Conversely, Infratech radiant heaters convert over 90% of their input energy directly into radiant heat and do not require the ventilation fireplaces and traditional gas-fired heaters do.

Heaters Built for Longevity

Infratech elements are rated for near 5,000 hours of continuous use. In many cases, you will find yourself enjoying your heater for years before a replacement would be necessary. Always refer to the C-Series manual for specific instructions, and be sure to disconnect the power to your heater before attempting to change an element.

About the Manufacturer

Founded in 1966, AEI has operated under a consistent premise: provide the finest in innovative outdoor cooking and patio heating products to discriminating consumers and commercial customers. AEI is also the only single source of quartz electric, horizontal gas, umbrella domed, Natural and Propane Gas heaters. Their mission has always been simple: supply the perfect heating equipment to enhance any patio then back it up with industry leading warranties and support
