Short Description

CD-Series 33" Dual Element 3000 Watt Electric Patio Heater CD3024SS

Description

The CD-Series 33" Dual Element 3000 Watt Electric Patio Heater (CD3024SS) by AEI Corporation. Double the warmth with Infratech's CD-Series Heaters. This high powered unit features dual element to provide a more concentrated heat. This makes the CD-Series an ideal choice for recessed installation, premium outdoor heating applications, and spaces with 7' To 9' mounting heights and large-scale coverage areas. Infrared quartz element heaters are 90% energy efficient, UL Listed for outdoor/indoor use and inexpensive to operate. This heater is ideal for use in fine homes, restaurants, hotels and more.

Includes

- CD-Series 33" Dual Element 3000 Watt Electric Patio Heater CD3024SS

Dimension

- 61.25" x 8" x 8" (20 lbs)

Features

- 3,000 watt
- 12.5 amps
- Available in 208 volt and 240 volt
- 33" Length
- 6" Stainless Steel Mounting Kit Included
- UL listed
- Outdoor or Indoor use
- Quartz Element
- Approximate 5,000 hours of use on quartz element
- 7' to 9' Mounting height
- 0 to 60° Mounting Angle
- Approximate 8' x 8' Heat Coverage
- Minimal Maintenance Costs
- Custom Powder Coating available in White, Almond, Beige, Bronze, Gray, Copper, and Black
- Flush Mount Kit Available #18-2295
- Made in the USA
- 3 Year Warranty

Infrared Heaters

While most heaters today circulate warm air through a fan, which in turn heats the air itself, infrared heaters heat surrounding objects and people. This means infrared heaters do not dry out the air like their fuel infused counterparts. Infrared heating is an energy-efficient heating solution that is ideal for both indoor and outdoor spaces. By utilizing quartz elements our infrared heaters are able to emit a safe, clean wavelength of light that may only be absorbed by solid objects. This means the heat is transferred directly to you from your heater. Infrared heat does not blow away in breezy locations and the quartz elements are completely odorless.

Better than Traditional Outdoor Fireplaces. Traditional fireplaces are less than 50% efficient when producing heat. Fireplaces also require ventilation, have a larger profile, provide limited heat control, and require more maintenance. Infratech heaters convert over 90% of their input energy directly into radiant heat, emit zero greenhouse gasses, and are extremely easy to manage.

About the Manufacturer

Founded in 1966, AEI has operated under a consistent premise: provide the finest in innovative outdoor cooking and patio heating products to discriminating consumers and commercial customers. AEI is also the only single source of quartz electric, horizontal gas, umbrella domed, Natural and Propane Gas heaters. Their mission has always been simple: supply the perfect heating equipment to enhance any patio then back it up with industry leading warranties and support
