Short Description

CD-Series 61" Dual Element 6000 Watt Electric Patio Heater CD6024SS

Description

The CD-Series 61" Dual Element 6000 Watt Electric Patio Heater (CD6024SS) by AEI Corporation. Double the warmth with Infratech's CD-Series Heaters. This high powered unit features dual element to provide a more concentrated heat. This makes the CD-Series an ideal choice for recessed installation, premium outdoor heating applications, and spaces with 10' To 14' mounting heights and large-scale coverage areas. Infratech is 90% energy efficient, UL Listed for outdoor/indoor use and inexpensive to operate. This heater is ideal for use in fine homes, restaurants, hotels and more.

- Approximate 11' x 11' Heat Coverage
- Minimal Maintenance Costs
- Custom Powder Coating available in White, Almond, Beige, Bronze, Gray, Copper, and Black
- Flush Mount Kit Available: #18-2305
- 3 Year Warranty

- Made in the USA

Infrared heaters

produce heat in a similar fashion to the sun. They warm surrounding objects and people, not the surrounding air. Infrared heat warms you directly by throwing out a steady stream of heat particles. By utilizing quartz elements our infrared heaters are able to emit a safe, clean wavelength of light that may only be absorbed by solid objects. This means the heat is transferred directly to you from your heater. With these types of heaters your guests don't have to wait to warm up, like with ordinary heaters. With infrared heat they warm up rapidly, with fast acting heat rays that eliminate the cold. Infrared heat does not blow away in breezy locations and the quartz elements are completely odorless.

Outdoor Electric Heaters

Traditional fireplaces are less than 50% efficient when producing heat. Conversely, Infratech radiant heaters convert over 90% of their input energy directly into radiant heat and do not require the ventilation fireplaces and traditional gas-fired heaters do. This means your heater can be installed in a variety of locations including: Patio Terrace Pergola Poolside Deck Balcony Outdoor Kitchen Outdoor Dining Space

No Eye Sores

These heaters have been uniquely designed in order to warm your outdoor spaces with minimal visual impact. There are a variety of installation options available as well. You may choose from a flush mount, ceiling mount, pole mount or wall mount for your installation.

About the Manufacturer

Founded in 1966, AEI has operated under a consistent premise: provide the finest in innovative outdoor cooking and patio heating products to discriminating consumers and commercial customers. AEI is also the only single source of quartz electric, horizontal gas, umbrella domed, Natural and Propane Gas heaters. Their mission has always been simple: supply the perfect heating equipment to enhance any patio then back it up with industry leading warranties and support
