Short Description

Breeze Balcony Fire 42" Table 4642BBR by Homecrest

Description

Breeze 42" Balcony Fire Table 4642BBR by Homecrest. Enjoy the beauty of the outdoors with Homecrest's stunning Breeze collection. The attractive and functional Breeze tables and fire tables feature an all-aluminum construction and are well suited for both dining and deep seating applications. Whether for residential or commercial, Breeze combines style and function to create a fresh look in any outdoor space.

This Homecrest fire table has a balcony table height (34.5"), which is perfect for casual meetings, drinks, and eating around the fire. Please note that other Homecrest fire tables, such as coffee, chat, and dining, all have different heights. Homecrest coffee height fire tables tend to be smaller than balcony tables (19"), chat fire tables are taller than coffee tables (24.5"), and dining fire tables are taller than chat tables (27.5").

Notice: Please leave the cardboard covering over the Crystal Fire Glass metal sensor guard when filling in your fire table with fyre glass/media and remove it once filled. Make sure to keep the sensor guard opening free of fyre glass/debris or the fire table will not light (see example picture above).

Durable Aluminum Frames

Homecrest's products go through an extensive process that cleans the raw material from any debris and prepares the surface for quality paint adhesion. A baked-on polyester powder-coat finish is applied, which will provide a durable finish season after season. All Homecrest powder-coat finishes are backed by an industry-leading warranty.

Homecrest Fire Tables

Available in coffee, chat, dining and balcony heights, Homecrest fire tables offer a powerful 60,000 BTU burner (30,000 BTU on fire tables with the Nova base) and come standard with your choice of fire jewelry, as well as a secure key, natural gas orifice, black 3/4" aluminum fire burner riser and match-light ignition.

Easy Propane Access

Each fire table base allows for a 20 lb vertical propane tank (utilized with all round, chat rectangular and chat square fire table bases) or horizontal propane tank (utilized with coffee square and rectangular fire table bases). These tanks are hidden, yet are easily stored and accessed by being mounted on the door or using a pull-out drawer. Homecrest fire tables can either be fueled by propane or converted to natural gas.

External Key

Each fire table comes equipped with a removable key valve, providing easy flame control when in operation and the added safety of a removable key to prevent tampering when not in use.

Fire Burner Construction

All of Homecrest's fire pan inserts come standard with an elevated 3/4" black aluminum riser to prevent heat transfer to the top. All of the fire burner/pan inserts are stainless steel and are powder-coated black to avoid discoloration of the burner surface. Homecrest's 20" round-shaped fire burner inserts provide additional safety, concentrating the flames towards the center of the burner.

Fire Table Accessories

Homecrest offers several reflective fire jewelry options, lazy susans, painted aluminum lids and fire table

cover options. Homecrest highly recommends the use of a glass guard when operating fire tables in windy conditions. Prolonged exposure to flames that are blown flat to the table surface may cause slight discoloration of the cosmetic surface.

About the Manufacturer

Homecrest combines a rich history of quality and classic design with today's demand for affordable luxury and versatile living. Homecrest's focus has broadened to encompass the increasing demands of sophisticated, style-driven consumers seeking to complement their homes' interior designs and create a seamless flow between indoors and out. Homecrest is poised to build its future on consumer and contract needs, innovative new products and global opportunities.
