Short Description

DISC Havenhill Sling Swivel Rocker Balcony Stool 4A780 by Homecrest

Description

The Havenhill Sling Swivel Rocker Balcony Stool (4A780) by Homecrest combines the strength and durability of aluminum with the comfort of a premium-quality double layer sling to create a chair that's easy to love. Havenhill collection chairs feature high backs, distinct flared edges and Art Deco inspired design, which will create a feeling of opulence and sophistication in any outdoor setting. Built for commercial or residential use, these chairs are well-suited for both resort decks and backyard patios. Homecrest's famous slings are quick-drying, available in a variety of durable color finishes and conform easily to the sitter's body, enabling you to relax in style.

- Aluminum Frame has 15 year Residential / 5 year Commercial warranty against structural failures
- Finish has 5 year warranty against peeling, flaking or blistering

Care & Maintenance

Enjoy your Homecrest furniture for years to come by keeping it in good shape! Simply hose off to clean and spot treat for stains, but avoid power washing. You can further protect your aluminum frame by waxing it at least once a year. If you plan on using your sling near salt water or an indoor pool, wipe down and wax regularly to prevent paint blistering. Make sure to store your chair right-side up during cold winter weather to prevent damage caused by ice.

Durable Aluminum Frame

Homecrest's products go through an extensive process that cleans the raw material from any debris and prepares the surface for quality paint adhesion. A baked-on polyester powder-coat finish is applied, which will provide a durable finish season after season. All Homecrest powder-coat finishes are backed by an industry-leading warranty.

Double Layer Slings

Homecrest's double layer sling has been a consumer favorite for decades, offering unsurpassed comfort and exceptional longevity. The Homecrest double layer sling uses internal support rails to shape and stretch the sling, which allows for the sling to ergonomically conform to the body. After the first sew line is in place, slings go through a five-thread serging process that doubles the strength of the seam. Sling construction is finished with a sewn-on welt. Welting is attached with a third sew line to combine the multiple layers of fabric. Finally, Homecrest slings are static-load tested to ensure durability of seam strength by dropping a 125 lb. weight on a sling chair for 50,000 cycles. Outdoor double layer slings are protected with an industry-leading 5 year residential/ 2 year commercial warranty, and are easily field replaceable.

Differences in Dining Heights

Homecrest offers a variety of seating and table heights for several types of market applications ranging from lounging to dining, cafe, balcony and bar. It is important to note the desired seating height when selecting tables or pairing with existing tables or seating.

Balcony Seating & Table Collections

Balcony seating pieces have an average seat height of 24" and are commonly referred to as counter height. Balcony swivel rockers have an average seat height of 20.5". Most balcony collections are available in sling and metal, with and without arms. Be sure to select balcony heights for both the table, which has a 34" average height, and the seating collection to ensure proper fit.

What is Welt?

Welt goes by several names. It can be called a welt trim, welt cord, welt piping, or simply welting. It is the decorative trim around the edges of a cushion to give the cushions a more finished look. A thin piece of cord or piping is wrapped in fabric and sewn to the seams of a cushion. It serves two primary functions. The first is functional, helping to strengthen and protect the seams of the cushion. The second is visual. Welt gives cushions a more finished look and emphasizes the shape of the cushion. Welt that matches the color of the

cushion fabric is called a "matching" or "self" welt. Welt that is a different color than the color of the cushion fabric is called a "contrast" welt.

Adding a welt to a cushion is a custom process and may extend an order's lead time by 2 - 4 weeks. There may also be an additional charge for adding welt, which varies by manufacturer.

About the Manufacturer

Homecrest combines a rich history of quality and classic design with today's demand for affordable luxury and versatile living. Homecrest's focus has broadened to encompass the increasing demands of sophisticated, style-driven consumers seeking to complement their homes' interior designs and create a seamless flow between indoors and out. Homecrest is poised to build its future on consumer and contract needs, innovative new products and global opportunities.
