Care and Maintenance

HDPE Frames Use this method for quick clean-ups throughout the season. Add in the bleach solution noted below to easily sanitize and eliminate any stubborn stains or dirt build-up from the winter months. All you need to clean Polywood is mild dish soap, warm water, and a soft cloth! For extra cleaning power or to sanitize, mix 1/3 parts bleach with 2/3 parts water and apply the bleach mixture to the finish with a clean cloth. Allow the bleach solution to sit on the lumber for a few minutes; it will not affect the color of the lumber. Loosen any dirt or debris that may catch in the surface grooves of the lumber by scrubbing the bleach mixture with a soft-bristle brush. Rinse thoroughly, and air dry or wipe dry with a soft cloth.

Teak: Long-term, teak furniture develops a pleasing silvery gray patina, which is cosmetic and not an indication of dryness. Its natural oils help keep this hardwood strong and durable in a variety of environments, so there's very little maintenance. Because teak is very weather-resistant, it doesn't need to be stored during the winter or covered with protective tarps. However, covering teak furniture will protect the surface from elements such as hail, wind, and snow, which can cause cosmetic damage. To keep the original golden honey finish, apply a very thin layer of Linseed or Teak oil to your furniture 1-2 times a year, depending on exposure. Cleaning with teak cleaner is recommended every 2-3 years, along with the oil application.

Cushions & Outdoor Fabric: Regular cleaning with mild soap and water will help prevent the build-up of dirt, which can generate mildew. Simply spot-treat stains with mild soap and water, rinse, and allow the fabric to air dry. Cushions will dry much faster when removed from the frames and placed on their sides or edges.
