- Amish Made in The USA

- Some assembly required
- Contact us for two-tone color options

About the Manufacturer

The Berlin Gardens difference: Our furniture is solidly built, beautifully designed and amazingly durable. There's a reason. Our team of Amish craftsmen combine old world skills with modern technology and a commitment to doing the job right. You'll find extra value engineered in our products like welded aluminum frames under our tables and thicker support pieces. Why pick poly? Poly lumber makes strong, comfortable outdoor furniture without the hassles typically associated with upkeep. It's easy to care for, needs no painting and can withstand even harsh weather. Poly is an environmentally friendly choice, because it's made from recycled milk jugs.
