**Cast Aluminum Details:** Casting is the process where melted metal is poured into molds to create distinctive shapes and designs. Castelle uses this handcrafted process to engineer the intricate aluminum detailing found on their frames. The delicate nature of the molds and hand-poured aspect of this process demands expert craftsmanship, but it results in a one-of-a-kind creation.

**Welted Cushions:** Welt goes by several names. It can be called a welt trim, welt cord, welt piping, or simply welting. It is the decorative trim around the edges of a cushion to give the cushions a more finished look. A thin piece of cord or piping is wrapped in fabric and sewn to the seams of a cushion. It serves two primary functions. The first is functional, helping to strengthen and protect the seams of the cushion. The second is visual. Welt gives cushions a more finished look and emphasizes the shape of the cushion. Welt that matches the color of the cushion fabric is called a "matching" or "self" welt. Welt that is a different color than the color of the cushion fabric is called a "contrast" welt.

**Tufted Cushions:** Tufted cushions are made by sewing the back and front of the cushion together in at least one place, usually in the center of the back cushion. This process can add more stability to the fiber fill, but the choice is mostly for style. This look pairs best with European or vintage inspired designs. Castelle offers tufted cushions with your choice of button.

## Warranty

Castelle's warranty covers manufacturing defects; normal wear and tear is not included. With a little bit of care, your furniture will outlive the warranty for many years.

- Frame has a 15-year residential against structural failure or manufacturing defects
- Finish has a 5-year residential warranty against peeling and blistering under normal use and proper

maintenance

- Cushions have a 2-year warranty against manufacturing defects in assembly
- Fabrics have a 5-year fade warranty

## Care and Maintenance

**Frame:** Simply hose off or wipe down your frame to clean it! Avoid using harsh cleaners, brushes, or power washers, which could damage the finish. Take extra care when placing your furniture in humid or coastal settings; accumulation of salts and other debris can cause damage to your frame.

**Cushions & Outdoor Fabric:** Regular cleaning with mild soap and water will help prevent the build-up of dirt, which can generate mildew. Simply spot-treat stains with mild soap and water, rinse, and allow the fabric to air dry. Cushions will dry much faster when removed from the frames and placed on their sides or edges. For more information, please visit the fabric manufacturer's website.

**Covers & Storage:** When not in use, we recommend using a protective cover with your furniture. During harsh weather and extreme temperatures, we recommend storing the cushions in a shed or garage and covering the frames with protective covers. If you store the frames indoors during the winter, avoid storing them upside down, which can trap moisture.
