Short Description

The Eternity Hammock blends style, comfort and convenience to create the ultimate outdoor lounging experience.

Description

The Eternity Hammock blends style, comfort and convenience to create the ultimate outdoor lounging experience. This hammock is great for families and people who like to entertain, as its unique design comfortably accommodates more people than your typical hammock frames. It allows up to three people to enjoy a day outside gently swaying in the comfort of a yard, patio or at the beach. Conveniently, a teak table is suspended in the middle of the frame as a surface for whatever you would like to enjoy outside. The hammocks themselves are available in two styles: quilted or woven. The quilted hammocks are ideal for a more comfortable lounging experience where moisture is not prevalent. They should be stored in a dry space during the night or rainfall. The woven hammocks are perfect for warmer climates and where wet bodies may want a place to lounge and dry off. They can stay outdoors year round.

Community Support Abroad Trinity Hammocks partners with rural communities in both Thailand and Cambodia to produce handmade quilted and woven hammocks. Through this partnership, these communities are able to develop financial independence, and are given an alternative to the hardships of field and sweatshop labor. It also allows them to invest the profits back into the community to fund educational and vocational programs. With your purchase, you are not only supporting individual artisans, but their communities as a whole.
