- Does not splinter, crack, chip, peel or rot
- Great for residential and commercial places
- Made in the USA
- Some assembly required
- 20 Year Limited Residential Warranty
- One Year Limited Commercial Warranty

About Revolution Fabric

Revolution was introduced to the furniture industry in March 2014. Revolution was the first PFC chemical free performance fabric to hit the marketplace and was the only one made entirely in the United States after much of the textile business went overseas in 2008. Revolution has become a go-to fabric in the interior design community, because it can be used in just about any type of project; whether it's a sectional for a multi-million dollar beach house or kitchen banquette cushions for a small family home. The cleanability and price point is perfect for clients designing on a budget.

How to Clean Revolution Fabric

- Small stains can be removed with a mixture of mild dish soap and water.
- For tougher stains, a mix one ounce of bleach with 30 ounces of water in a spray bottle. If possible, place a clean towel between the fabric and foam cushion to absorb any excess moisture. Set the nozzle to "fan" the spray pattern and wet out the entire side of the cover where the stain is. Then wipe the entire cover with a clean cloth to remove any excess moisture. Then spray the same area with clean water to rinse the bleach solution out of the fabric. Again wipe the entire cover with a clean cloth to remove any excess moisture. Allow the cover to air dry

Weather-Proof Materials

The high-density polyethylene (HDPE) used in this collection is made to withstand any type of weather condition. From rain or shine, to snow, salty water and ice - the high durability of the HDPE ensures that your new patio furniture will not crack or splinter outdoors.

Eco-Friendly Materials

This collection was made from 90% post-consumer materials that came from recycled plastic bottles.

UV-Protected Finishes

The color in your new patio furniture runs through the entire material. This means low maintenance and no need for paint touch-ups if it is scratched. The UV-inhibiting pigment system also reduces fading over the years, ensuring that your new patio furniture stays brilliantly colored for years.

About the Manufacturer

Back in 1990, we were the first to create outdoor furniture from recycled plastic materials. "Made with genuine POLYWOOD lumber" is a brand promise. Our furniture is built to be enjoyed season after season . More importantly, our goal is to help create spaces where friends and family can gather, relax, and connect. POLYWOOD recycles an average of 400,000 milk jugs per day. Truckloads of recycled milk jugs are transformed into genuine POLYWOOD lumber, which is then used to construct our furniture.
