Short Description

The Solfire Fire Pit is the newest design from ModFire, designed to radiate silhouettes of light and shadow. People gather and shimmering patterns emerge.

Description

The Solfire Fire Pit is the newest design from ModFire, designed to radiate silhouettes of light and shadow. People gather and shimmering patterns emerge. A pedestal elevates the fire. The Solfire is constructed from 1/8th plate steel, and the 10" patterned screen surrounds a 14" firebox. The modern star burner is mounted in the firebowl to provide a perfectly dispersed flame. ModFire recommends adding smooth river rocks or fire glass to disperse the flame and create a personalized look. Each Urbanfire is unique and will have slight variations in size and finishing.

Includes

- One (1) ModFire Solfire Fire Pit with clear fire-glass filler

Dimensions

- Solfire: 24"W x 24"D x 17.5"H

Features

- Ultra modern design
- Vibrant color finishes
- Steel construction
- 75,000 BTU burner (in propane and natural gas versions)

ModFire Craftsmanship Each Modfire is crafted in the same Arizona studio where they designed the very first one for their own patio. Modfire was born and raised in the USA, and each Modfire product is hand-crafted with the passion and quality that can only come from being American-made. Typically a single artisan will work with a Modfire through the entire manufacturing process – ensuring that each weld is firm and each curve is smooth.
