Short Description

Sunpak 25,000 BTU Black Infrared Mounted Heater S25

Description

The Sunpak 25,000 BTU Black Infrared Mounted Heater (S25) By AEI Corporation. This heater is simple to operate and uses draft free and highly energy efficient infrared radiant energy just like the sun's warming rays. SUNPAK® heaters warm object rather than trying to inefficiently heat the air. Each heater will heat about 10' x 10' area depending on wind conditions. SUNPAK® heaters have been installed world-wide in thousands of premium residential and commercial installations.

The Sunpak® Models S25 is an outdoor infrared heater available to be used with natural or propane gas. These heaters can be either wall or ceiling mounted. Infrared heaters utilize a unique heating system that warms your guests like the sun. Sunpak ® heaters are specifically designed to provide heated comfort in an outdoor environment; the Model S25 has been used both in residential and commercial outdoor patios across the United States for years.

Sunpak ® heaters are unvented need a continuous supply of fresh air and proper ventilation to operate safely. This heater is not to be used inside residences and other confined areas where the operational and safety requirements of this heater cannot be met.
