- Minimal Maintenance Costs
- Flush Mount Kit Available: #18-2305
- Custom Powder Coating Available in White, Almond, Beige, Bronze or Black for additional cost
- 3 Year Warranty
- Made in the USA

Outdoor Heating For Continuous Use

Infratech elements are rated for near 5,000 hours of continuous use. In many cases, you will find yourself enjoying your heater for years before a replacement would be necessary. Always refer to the W-Series manual for specific instructions, and be sure to disconnect the power to your heater before attempting to change an element.

Safer & Cleaner

Because infrared heaters do not use kerosene or propane, they don't produce pollutants such as carbon monoxide, and will not become a fire hazard due to the lack of a flammable fuel source. Infrared heating elements are sealed inside of a quartz tube so they are much easier to use versus their fuel-filled counterparts.

3,000 Watt Stainless Steel Quartz Heater

These W-series heaters are energy efficient, with wide, polished reflectors that provide comfortable and uniform heat coverage.

Infratech quartz elements provide pleasant medium wave heat. By utilizing quartz elements our infrared heaters are able to emit a safe, clean wavelength of light that may only be absorbed by solid objects. This means the heat is transferred directly to you from your heater. Infrared heat does not blow away in breezy locations and the quartz elements are completely odorless.

What about the competitors?

Competing heaters utilize short wave halogen elements which produce a more intense heat and emit a very bright, harsh-colored light. For residential and commercial use, this W3024SS model is made of commercial grade stainless steel.

By contrast, Infratech medium wave elements effectively heat your space, while providing a soft, warm glow that is practically unnoticeable.

About the Manufacturer

Founded in 1966, AEI has operated under a consistent premise: provide the finest in innovative outdoor cooking and patio heating products to discriminating consumers and commercial customers. AEI is also the only single source of quartz electric, horizontal gas, umbrella domed, Natural and Propane Gas heaters. Their mission has always been simple: supply the perfect heating equipment to enhance any patio then back it up with industry leading warranties and support
