Short Description

Infratech 39" Dual Element 4000 Watt Electric Patio Heater WD4024SS

Description

The Infratech 39" Dual Element 4000 Watt Electric Patio Heater (WD4024SS) By AEI Corporation. Double the warmth with Infratech's WD-Series heaters. This high powered unit features dual element, to provide a more concentrated heat. This makes the WD-Series an ideal choice for recessed installation, premium outdoor heating applications, and spaces with 8' to 12' mounting heights and large scale coverage areas. Infratech infrared heaters are 90% energy efficient, UL listed for outdoor and indoor use and are easy and inexpensive to operate. This heater is ideal for use in fine homes, restaurants, hotels and more.

Includes

- One (1) Infratech 39" Dual Element 4000 Watt Electric Patio Heater

Features

- 4,000 watt
- 16.7 amps
- Available in 208v, 277v, 240v and 480v
- 39" Length
- 6" Stainless Steel Mounting Kit Included
- UL listed
- Outdoor or Indoor use
- Quartz Element
- Approximate 5,000 hours of use on quartz element
- 8' to 12' Mounting height
- 0 to 60° Mounting Angle
- Approximate 8' x 10' Heat Coverage
- Minimal Maintenance Costs
- Custom Powder Coating available in White, Almond, Beige, Bronze and Black
- Flush Mount Kit Available: #18-2300
- 3 Year Warranty

- Made in the USA

Patio Heating

Similar to being warmed by the sun, infrared heaters heat surrounding objects and people, transferring the heat to surfaces and skin. Objects and people absorb the heat given off by the infrared heater, which in turn increases the warmth in the room via the people and objects that have been warmed. Because air is not heated and circulated, the differential in temperature from the ceiling to the floor varies by 2 - 3 degrees total.

Clean & Efficient Heating

Infrared heating is an energy efficient heating solution that is ideal for both indoor and outdoor spaces. By utilizing quartz elements our infrared heaters are able to emit a safe, clean wavelength of light that may only be absorbed by solid objects. This means the heat is transferred directly to you from your heater. Infrared heat does not blow away in breezy locations and the quartz elements are completely odorless.

Unmatched Versatility

Traditional fireplaces are less than 50% efficient when producing heat. Infratech radiant heaters convert over 90% of their input energy directly into radiant heat and do not require the ventilation fireplaces and traditional gas-fired heaters do. This means your heater can be installed in a variety of locations including:

- Patio
- Terrace
- Pergola
- Poolside Deck
- Balcony
- Outdoor Kitchen
- Outdoor Dining Space

These heaters have been uniquely designed in order to warm your outdoor spaces with minimal visual impact. There are a variety of installation options available as well. You may choose from a flush mount, ceiling mount, pole mount or wall mount for your installation.

About the Manufacturer

Founded in 1966, AEI has operated under a consistent premise: provide the finest in innovative outdoor cooking and patio heating products to discriminating consumers and commercial customers. AEI is also the only single source of quartz electric, horizontal gas, umbrella domed, Natural and Propane Gas heaters. Their mission has always been simple: supply the perfect heating equipment to enhance any patio then back it up with industry leading warranties and support
