Short Description

The dark copper powder coated frame on this work of art lends the fountain a fairly rustic quality, blending natural simplicity with modern design. The clear glass face serves as a visually arresting surface over which the water softly trickles, as the soothing sounds lull you into a relaxed state. A halogen light at the crest of the fountain enhances the visual drama, and optional river pebbles in the basin improve the visual and acoustic appeal of this piece.

Description

The dark copper powder coated frame on this work of art lends the fountain a fairly rustic quality, blending natural simplicity with modern design. The clear glass face serves as a visually arresting surface over which the water softly trickles, as the soothing sounds lull you into a relaxed state. A halogen light at the crest of the fountain enhances the visual drama, and included river pebbles in the basin improve the visual and acoustic appeal of this piece.
