Description

The magnificent Nova Fountain features water flowing out of the top sphere collecting in the top basin and then dripping off the smooth rounded stone into the bottom basin. With multiple stages of flowing water, it is sure to please.

The fountain is made of the highest grade fiber reinforced concrete (GFRC), which not only reduces weight but is also much more durable than standard cast stone. The artists behind the making of this fountain have simulated the natural texture of the stone to perfection. Installation is very simple and one can be sure to enjoy the beauty and serenity of this fountain with little effort.
