Description

The Alaster Fountain features water running over it's finely squared edges which create a tranquil ambiance and soothing sound. The water gently cascades over the edges and down to the base of the fountain.

The fountain is made of the highest grade fiber reinforced concrete (GFRC), which not only reduces weight but is also much more durable than standard cast stone. The artists behind the making of this fountain have simulated the natural texture of the stone to perfection. Installation is very simple and one can be sure to enjoy the beauty and serenity of this fountain with little effort.
