Description

The Toja Grid Hammock Kit w/ Shade Sail for 4x4 Wood (HMKWHGR1S) by Toja Grid. The Toja Grid offers a modern approach to style & design. Our Double Hammock Kit is perfect for any outdoor living space. Quick and easy to assemble in under 2 hours! Brackets fit with standard 4x4 wood posts. The Toja Grid offers a modern approach to style & design along with affordability, quick assembly, and quality craftsmanship. Key Note: 4x4 is a size reference. The most common wood is actually 3.5" x 3.5" with rounded edges. Some types have sharp edges or are a true 4"x4" and will not fit. Also note that fresh pressure treated wood or wet wood will be swollen, we advise installing with dry wood

Includes

- Included in the kit:
 - Eight (8) TRIO Corner Brackets

- One (1) DOUBLE HAMMOCK kit
- One (1) Graphite (Grey) SHADE SAIL
- All screws & brackets to connect our parts to wood
- Excluded from the kit
 - Surface securing hardware
 - Wood

Dimensions

- TRIO Corner Bracket
 - Overall: 10.75"W x 10.75"D x 10.75"H
 - Opening: 3.75"W x 3.75"D x 7"H

Features

- Metal Parts:
 - 14 gauge zinc coated steel
 - 10 year outdoor powder coating
 - 12 wood screws included
- Shade Fabric:
 - 100% Synthetic HDPE (high density polyethylene) knitted fabric
 - 8 year fade resistance, easy to wash and keep clean
 - Stain resistant and will not mold or mildew
 - Strong tension straps and buckles to pull the shade tight and flat
 - 5 minutes to take down for winter / major storms
 - All hardware included to attach to wood
 - The unfolded size will seem small, if you're checking the size, please pull the shade as tight as you can and then measure it
- Hammock Kit
 - Made of Challenge Sailcloth. Rated to hold 500lbs of static evenly distributed weight. Each corner is reinforced with 3 bands of webbing wrapped around a heavy-duty marine grade stainless steel O-ring. 4 marine grade turnbuckles included to secure the O-ring to the GRID hangers, which are installed by 8 screws to each wood post

Tips

We often take a solo bracket with us when purchasing lumber, slide it on the ends of the wood to ensure proper fit

What Type of Wood Should be Used?

Any standard dry straight 6x6 wood will work. Our products were made to assemble with standard 8ft, 10ft and 12ft lengths available at most lumber yards. Note: 6x6 wood is in fact 5.5" x 5.5" - the industry simply calls it 6x6. We suggest cedar, however pressure-treated, engineered, tiger wood, and even IPE will work.

What Hardware Do I Need to Buy?

All the hardware you need is included in each box to connect our brackets to the 6x6 wood posts. The only hardware you need is the securing hardware, as we do not know where you will install your structure.

Where Can Toja Grid be Mounted?

We always advise our customers to check your local building codes prior to mounting your Toja Grid pergolas and Hammocks.

About the Manufacturer

Toja is a Canadian brand that offers high quality outdoor furniture and pergola systems at great value. Their mission is to provide customers with an inviting and comfortable outdoor environment that they will enjoy for many years. Toja's modern approach to style and design along with affordability is what sets them apart from the competition.
