Description

The Atri Falls Fountain featured in a beautiful Atri finish is sure to amaze all as water flows from the top of the fountain and down the sophisticated face into the basin at the bottom. With a commanding presence and soft water noise, it is a great addition to any setting.

The fountain is made of the highest grade fiber reinforced concrete (GFRC), which not only reduces weight but is also much more durable than standard cast stone. The artists behind the making of this fountain have simulated the natural texture of the stone to perfection. Installation is very simple and one can be sure to enjoy the beauty and serenity of this fountain with little effort.
