Description

The Double Oblique Floor Fountain featured in a beautiful sierra finish, is extraordinary in design with two upside down pyramids stacked on top of each other. Water flows from the top basin collecting in the second basin before cascading into the lower basin. The water noise and beauty of this fountain is sure to add serenity and tranquility to any outdoor setting.

The fountain is made of the highest grade fiber reinforced concrete (GFRC), which not only reduces weight but is also much more durable than standard cast stone. The artists behind the making of this fountain have simulated the natural texture of the stone to perfection. Installation is very simple and one can be sure to enjoy the beauty and serenity of this fountain with little effort.
